Introduction

This list is designed to match Spanish terms for fruits and vegetables with their English equivalents--and vice versa. The Spanish terms are those primarily in use along the Mexican border, as opposed to being comprehensive Latin-American usage.

To make this list easier to use, the following conventions apply:

- Botanical names appear in italics
- English terms have all letters capitalized
- Spanish terms are in lower case

Plants are listed and cross-referenced both by their Spanish name and common name. The entries for common names include all Spanish names for that plant. The Spanish entries are listed individually with the approved name and botanical name.

Scott Sannar, Beth Galvan, Rogelio Lozano, Bill Turbeville, Rene A. Colon, Guadalupe Mackley, and James Mackley share credit for whatever is right in this list. For whatever is wrong, the Professional Development Center takes the blame. Report errors or omissions by using a comment sheet from your Plant Import: Nonpropagative Manual.
